

## Glacier Transit & Storage Enters 8th Year as a SmartWay Transport Partner and Second Consecutive Year as a SmartWay High Performer

Industry: Logistics

*Glacier Transit & Storage, Inc. successfully completes its 2018 emissions reporting with SmartWay Transport Partnership. SmartWay's Partner tools are used to measure progress toward cleaner air and more sustainable business practices.*

**WISCONSIN, Plymouth. February 6th, 2019.**

Glacier Transit & Storage, a leading statewide provider of transportation, logistics and supply chain solutions, continues its commitment to track and report its carbon accounting practices for a 8th consecutive year. Freight transportation is one of the fastest growing impacts on the environment and as consumer demand increases we are committed to respond with the most efficient and cleaner transportation practices.

Glacier Transit & Storage is a U.S. Environmental Protection Agency (EPA) SmartWay® Transport Partner. EPA recently approved our annual submission of Partnership reporting requirements for 2018. Glacier Transit & Storage joined the SmartWay initiative in 2011. Each year performance data is submitted and reviewed to qualify as a SmartWay partner.

“We are proud to say that we have furthered our company initiative of environmental responsibility by greatly reducing our carbon footprint, thus being named a **SmartWay High Performer** for the second consecutive year,” said Kyle Nothem, president of the company.

SmartWay is a voluntary and cost-free program that supports companies' initiatives to reduce greenhouse gas emissions from freight supply chain transportation activities. Operational strategies, data management tools and verified technology supports are provided. The SmartWay Partnership is a domestic and international freight and supply chain program that manages data for over 3500 partners across all domestic shipping modes in the US and Canada. SmartWay implements its goals to lower freight carbon footprints by conducting analysis and research of freight impacts, engaging with freight experts, anticipating and responding to trends, developing strategic resources and

communication strategies, and serving as an international model. International collaborations exist with Mexico, China and other Asian nations, Europe, and Latin America.

“Glacier Transit & Storage knows that partnering with SmartWay is good for business, people and the

environment,” says Cheryl Bynum, U.S. EPA’s SmartWay Director, “By partnering with us, Glacier Transit & Storage is demonstrating their commitment to sustainability through cleaner, lower carbon goods movement.”
